# Contents of Volume 31

Alonso J → Castro JR
Announcements 82
Bartosz G, Schön W, Kraft G, Gärtner H: Irradiation increases proteolysis in erythrocyte ghosts: a spin label study 117
Benassi M → Delpino A
Benŏ M, Mikulecký M, Hrabina J: Transfer factor of $^{131}I$ from the fallout to human thyroid dose equivalent after the Chernobyl accident 133
Blakely EA: Cell inactivation by heavy charged particles 181
Blakely E → Castro JR
Blattmann H: Beam delivery systems for charged particles 219
Boháček J → Hošek B
Böhne D: Light ion accelerators for cancer therapy 205
Castro JR, Petti PL, Daftari IK, Collier JM, Renner T, Ludewigt B, Chu W, Pitluck S, Fleming T, Alonso J, Blakely E: Clinical gain from improved beam delivery systems 233
Chu W → Castro JR
Collier JM → Castro JR
Daftari IK → Castro JR
D'Ambrosio N, Szabo K, Lichtenthaler HK: Increase of the chlorophyll fluorescence ratio F690/F735 during the autumnal chlorophyll breakdown 51
Delpino A, Gentile FP, Di Modugno F, Benassi M, Mileo AM, Mattei E: Thermosensitization, heat shock protein synthesis and development of thermotolerance in M-14 human tumor cells subjected to step-down heating 323
Di Modugno F → Delpino A
Feinendegen LE → Peterson H-P
Fleming T → Castro JR
Gärtner H → Bartosz G
Gentile FP → Delpino A
Goitein M: 3D treatment planning for heavy charged particles 241
Goulas Y → Schmuck G
Greenstock CL, Whitehouse RP: Radiation chemical studies of sensitization by 5-bromouridine-5′-monophosphate (5-BrUMP) 1
Hanson KP → Seiliev AA
Hartwig M: Probing DNA superstructure in human quiescent lymphocytes by X-ray-induced double-strand breakage 83
Heinrich G: Uptake and transfer factors of $^{137}Cs$ by mushrooms 39
Heinzmann U: Prenatal pathogenesis of hydro-micrencephaly induced by X-rays. An animal model 11
Hickman R → Wheeler KT
Hošek B, Boháček J, Šikulová J, Pospíšil M, Vacek A: Protection of early cellular damage in 1 Gy-irradiated mice by the elevation of extracellular adenosine 289
Hrabina J → Benŏ M
Hund M → Tempel K
Ignatius A → Tempel K
Ishikawa M → Takakura K
Kapiszewska M, Szumiel I, Lange CS: Damage at two levels of DNA folding measured by fluorescent halo technique in *X*-irradiated L5178Y-R and L5178Y-S cells 311
Kiefer J: Heavy ion effects on cells: chromosomal aberrations, mutations and neoplastic transformations 279
Kocsányi L → Szabó K
Koudela K, Ryznar R, Kozubek S, Slotová J: Induction of SOS repair by ionizing radiation. Results from experiments at accelerators 343
Kozubek S → Koudela K
Kraft G, Krämer M, Scholz M: LET, track structure and models. A review 161
Kraft G → Bartosz G
Krämer M → Kraft G
Lange CS → Kapiszewska M
Lett JT: Damage to cellular DNA from particulate radiations, the efficacy of its processing and the radiosensitivity of mammalian cells. Emphasis on DNA double strand breaks and chromatin breaks 257
Lichtenthaler HK → D'Ambrosio N
Lichtenthaler HK → Schmuck G
Lichtenthaler HK → Szabó K
Linde D van der → Schmuck G
Ludewigt B → Castro JR
Mattei E → Delpino A
Mikulecký M → Benŏ M
Mileo AM → Delpino A
Minegishi A → Takakura K
Moore SK → Wheeler KT
Moya I → Schmuck G
Nelson GB → Wheeler KT
Okada S → Takakura K
Pedrini A → Schmuck G

Pedroni E → Scheib S
Peterson H-P, Wangenheim K-H von, Feinendegen LE: Magnetic field exposure of marrow donor mice can increase the number of spleen colonies (CFU-S 7d) in marrow recipient mice 31
Petti PL → Castro JR
Pitluck S → Castro JR
Pospíšil M → Hošek B
Renner T → Castro JR
Richter P → Szabó K
Ryznar L → Koudela K
Sakai K → Takakura K
Salovsky PT, Shopova VL: Early biological effects of whole body irradiation on rat lungs 333
Scheib S, Pedroni E: Dose calculation and optimization for 3D conformal voxel scanning 251
Schimmerling W: Radiobiological problems in space. An overview 197
Schindler C → Schmuck G
Schmidt W, Schneckenburger H: Time-resolving luminescence techniques for possible detection of forest decline. I. Long term delayed luminescence 63
Schmidt W → Schneckenburger H
Schmuck G, Moya I, Pedrini A, Linde D van der, Lichtenthaler HK, Stober F, Schindler C, Goulas Y: Chlorophyll fluorescence lifetime determination of water-stressed C3- and C4-plants 141
Schneckenburger H, Schmidt W: Time-resolving luminescence techniques for possible detection of forest decline. II. Picosecond chlorophyll fluorescence 73
Schneckenburger H → Schmidt W
Scholz M → Kraft G
Schön W → Bartosz G
Seiliev AA, Zvonareva NB, Zhivotovsky BD, Hanson KP: Determination of some nuclear deoxyribonucleases in X-irradiated rat thymocytes 123
Shopova VL → Salovsky PT
Šikulová J → Hošek B
Slotova → Koudela K
Stober F → Schmuck G
Szabó K, Lichtenthaler HK, Kocsányi L, Richter P: A CCD-OMA device for the measurement of complete chlorophyll fluorescence emission spectra of leaves during the fluorescence induction kinetics 153
Szabo K → D'Ambrosio N
Szumiel I → Kapiszewska M
Takakura K, Ishikawa M, Minegishi A, Sakai K, Okada S: Inverse dose-rate effect of DNA breaks and inactivation of transforming activity induced by tritiated water and $^{60}CO$ $\gamma$-rays 299
Tempel K, Ignatius A, Hund M: DNA damage and repair in chick embryo cells following X-irradiation in vitro as compared to mammalian cells – biochemical and physico-chemical investigations 91
Urie MM: Uses of 3D planning in addition to creating a good treatment: ongoing studies at MGH/HCL 247
Vacek A → Hošek B
Wallen CA → Wheeler KT
Wangenheim K-H von → Peterson H-P
Wheeler KT, Hickman R, Nelson GB, Moore SK, Wallen CA: Relationship between DNA damage, DNA repair, metabolic state and cell lethality 101
Whitehouse RP → Greenstock CL
Zhivotovsky BD → Seiliev AA
Zvonareva NB → Seiliev AA
Announcement 349
